

INFLIGHT CATERING PRODUCTS
„MADE IN GERMANY“

PORTFOLIO

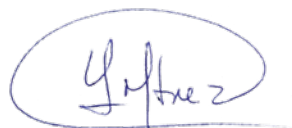

INFLIGHT CATERING PRODUCTS „MADE IN GERMANY“

When we founded our company in 2017, our main motivation was: To bring catering utensils produced on our doorstep to the market. Our vision appealed not only to local manufacturing but also to our quality standards, excellent working conditions, reduced delivery times and less environmental impact.

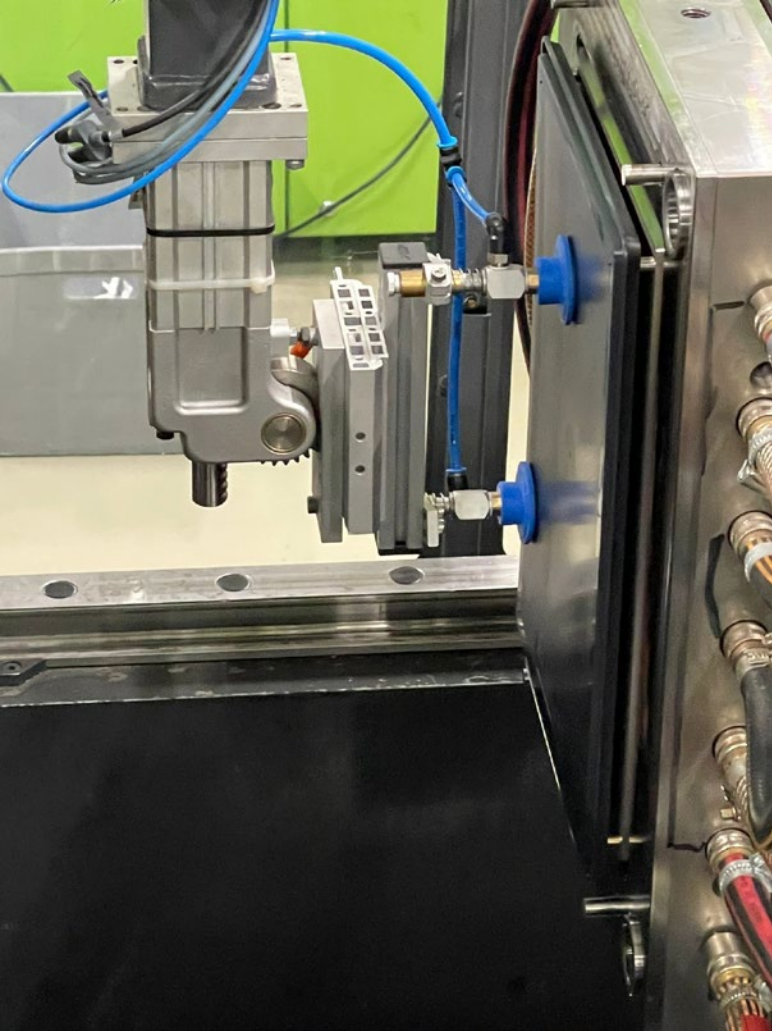

MARUKAS is a family business with its head office in Lower Saxony. Product development, toolmaking, production, and sales take place in Germany. This gives us the advantage of having a local representative for each phase of a project and thus also being able to react expeditiously to special requests from our clients.

We believe reacting to the changing conditions of a globalized world is our duty as a regional company. Our goal is to further expand our product portfolio with a greater focus on eco-friendly materials to address resource scarcity and the climate crisis. Constant research and optimization in materials are our tools to achieve this goal.

In close cooperation with our suppliers and partners we stand for reliability and sustainability.

A handwritten signature in blue ink, enclosed in a blue oval. The signature appears to read 'Yamir Martínez'.

Yamir Martínez, CEO

WE FOCUS ON THE REDUCTION OF ENVIRONMENTAL IMPACT AND ENERGY CONSUMPTION DURING THE MANUFACTURING PROCESS.

CUSTOMIZATION

Would you like your company's branding visible on your equipment? We offer individual designs for our products. Whether through material selection, color, tone, or logos – we can enact your vision.

FROM RECYCLED MATERIAL

Sustainability is an important part of our mission. Our products are available in a wide range of options including from exclusively recycled material.

DISHWASHER SAFE

Our trays and drawers have an easy-care surface which withstands industrial cleaning.

BPA FREE

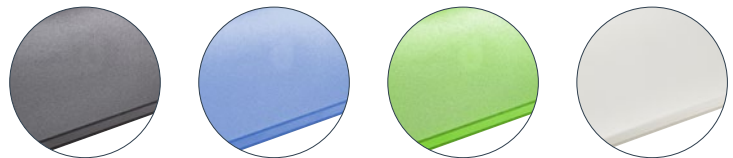

None of our standard materials contain the plasticizer bisphenol A.

RECYCLABLE

All our products are recyclable by conventional methods.

SUSTAINABLE PRODUCTION IN GERMANY

Waste management and recycling processes help reduce waste and conserve resources. That's why we believe in recycled materials as the path to follow for any consumer goods.

„Made in Germany“ is a seal of quality, precision and reliability. Due to the short supply chain between production and sales, our delivery is fast and flexible.

⁽¹⁾ Approximate weight for ABS

⁽²⁾ Approximate weight for PP

The price of our products is based on your needs. We are happy to provide you with a non-binding offer.

Do you need different in-flight equipment? Or have questions about our customization options? Contact us - we are happy to advise you!
